

This Internship SAMPLE is for the purposes of January MBA Advantage Only.

Analytics Development Program Intern
Liberty Mutual
Boston, MA

Description:

Do you enjoy using data to identify and solve complex business problems? How about a collaborative and dynamic work environment dedicated to developing industry-leading analytical talent? If so, consider joining Liberty Mutual Insurance, a global Fortune 100 company that specializes in just that – business analytics.

You will participate in a 10-12 week internship program specializing in problem solving through consulting with internal stakeholders and utilizing business analytics. You will have the opportunity to research, analyze and recommend solutions that support high impact decision making. Our goal is to provide you with a positive summer experience, filled with “real-world” projects that directly impact the organization.

This internship will also allow you to explore Liberty Mutual as a possible full time employer. During your internship, you will receive all the tools you need to be successful – this includes on-the-job training, a mentor from the team, meaningful work and management support. You will also participate in educational and social programs that will accelerate your development, as well as an online community of interns that will provide a collegial environment to help with your transition from school to work. Opportunities are available in Boston, MA.

Responsibilities:

- Participate in robust on-the-job training opportunities to learn about the insurance industry, enhance your skills and fine-tune your business acumen
- Work individually, or as part of a team, to assist with projects of increasing responsibility to build experience and skills at a pace matched to your demonstrated proficiency
- Gather and analyze data from various business sources using both qualitative and quantitative methods; generate reports and presentations based on findings
- Partner with current analysts to identify opportunities and make actionable recommendations to the business and present to business in a clear and concise manner
- Gain an understanding of high-level department goals and align proposed solutions with those goals
