University at Buffalo
School of Management

Here is how we're changing the world of business.

At the UB School of Management, ambitious students launch their careers, seasoned executives transform their lives and creative entrepreneurs turn concepts into reality. Our alumni leave their mark around the globe, and our faculty delivers research that has a positive impact on organizations and society. With a high return on investment for our graduates and a focus on team skills and leadership development, it's easy to see why major media continually rank the UB School of Management as one of the best in the nation.

From day one, our Career Resource Center works exclusively with School of Management students to help them develop career strategies and hone the tools they need for an effective job search and successful career.

By preparing leaders for any industry...

1 What is at the core of every great leader? We've been asking corporate recruiters that question for decades and used their insights to create LeaderCORE™, our exclusive UB MBA leadership development program. And that's just the beginning. Our elite Undergraduate Honors program readies the next generation, while our centers deliver programs and research that strengthen leadership capabilities in executives, professionals and organizations.

...and helping game-changing ideas take root

2 Our Center for Entrepreneurial Leadership supports entrepreneurs as they enhance their talents, overcome challenges and advance their businesses. Through an entrepreneurship minor and concentration for undergraduates, and a thriving ecosystem for MBAs, students develop their startups. And, during the Panasci Technology Entrepreneurship Competition, they compete for thousands of dollars in seed funding to get their ideas off the ground.

By harnessing the power of our alumni network...

3 With 49,500 graduates in 87 countries worldwide, our alumni lead Fortune 500 companies, launch startups, run community nonprofits and leave their mark everywhere they go. Back on campus, they mentor students, share their experiences and recruit talented interns and graduates through our award-winning Career Resource Center.

...and sharing faculty discoveries with the world

4 Our faculty brings decades of international experience into the classroom. They're outstanding educators, and several have received the SUNY Chancellor's Award for Excellence, the highest faculty honor in the State University of New York system. They're also top scholars whose research makes headlines worldwide and helps organizations operate more effectively.

By collaborating to innovate across the globe

5 The School of Management has been accredited by AACSB International since 1930 — but we've never stopped innovating. We established the first-ever U.S. MBA program in China and continue to offer programs and partnerships in Africa, Singapore and India. In Buffalo, our dual and collaborative MBA programs train individuals to lead in their respective fields, including medicine, law, architecture, public health, social work and more.
